

Stock Portfolio Risk & Return Analysis

Final Investor Report

A professional portfolio-level review of performance, risk, diversification and scenario outcomes.

Portfolio Overview & Allocation

Understanding where the capital is invested

RETURN

RISK

DIVERSIFICATION

SCENARIO

Total Portfolio Value

Number of Stocks / Assets

Initial vs. Ending Value

Portfolio Return

Recommended visual: Allocation Pie / Donut Chart

Return & Volatility Analysis

Measuring performance and investment risk

Average / Annualized Return

Standard Deviation / Volatility

Best and Worst Periods

Recommended visuals: Cumulative Return Line Chart + Return Bar Chart

Risk-Adjusted Performance

Evaluating return relative to risk

RETURN

RISK

DIVERSIFICATION

SCENARIO

Sharpe Ratio — return relative to total volatility

Treynor Ratio — return relative to systematic risk

Maximum Drawdown — largest peak-to-trough decline

Beta — sensitivity to the benchmark

Diversification Insights

Understanding relationships between assets

Correlation Matrix / Heatmap

Identify highly correlated holdings

Identify lower or negatively correlated holdings

Highlight concentration risk and diversification benefits

Scenario / What-If Analysis

Testing portfolio resilience

RETURN

RISK

DIVERSIFICATION

SCENARIO

Base Case — current assumptions

Best Case — favorable return assumptions

Worst Case — adverse return assumptions

Compare portfolio value and return across scenarios

Key Recommendations

Turning analysis into investor-focused actions

Assess whether returns justify volatility

Review concentration in highly correlated assets

Monitor maximum drawdown and downside risk

Use Sharpe and Treynor alongside absolute returns

Reassess the portfolio under different scenarios

Executive Summary

Major findings at a glance

Performance: summarize the portfolio return

Risk: highlight volatility and maximum drawdown

Diversification: summarize correlation findings

Scenario: identify the most resilient case

Recommendation: state the most important portfolio action
