

INVESTMENT KPI & ROI TRACKING REPORT

Portfolio Performance, ROI, Risk & Scenario Analysis

Prepared by: Dilshad Pervin

Project: Investment Analytics Dashboard

Period: 2020–2026

01 Executive Summary

The Investment KPI & ROI Tracking project evaluates a diversified portfolio across Stocks, Bonds, Startups, and Real Estate.

The analysis measures investment returns, compares actual performance with budgeted expectations, evaluates risk-adjusted returns, and tests portfolio performance under different market scenarios.

The portfolio has a total investment of ■75.25 lakh and a current value of approximately ■96.96 lakh, generating an average ROI of 26.45%. Startups delivered the highest average ROI, while Bonds provided comparatively lower but more stable returns.

Scenario analysis indicates approximately ■1.11 crore in a Bull Market and ■87.26 lakh in a Bear Market.

02 Portfolio Allocation Overview

Real Estate represents the largest portion of the portfolio, accounting for approximately 49.83% of total invested capital.

Asset Type	Investment	Allocation
Stock	■10.00 Lakh	13.29%
Bond	■11.50 Lakh	15.28%
Startup	■13.50 Lakh	17.94%
Real Estate	■37.50 Lakh	49.83%

03 ROI Performance Analysis

Startups generated the highest average ROI at 46.00%, outperforming budgeted ROI by 28.40 percentage points.

Asset Type	Average ROI	Budgeted ROI	Variance
Stock	23.00%	11.00%	12.00%
Bond	10.98%	7.40%	3.58%
Startup	46.00%	17.60%	28.40%
Real Estate	26.20%	10.20%	16.00%

04 Top Performing Investments

The top-performing investment was INV011, a Startup investment, with an ROI of 80.00%.

Rank	Investment	Asset Type	ROI
1	INV011	Startup	80.00%

Rank	Investment	Asset Type	ROI
2	INV014	Startup	55.00%
3	INV012	Startup	50.00%
4	INV016	Real Estate	45.00%
5	INV017	Real Estate	30.00%

05 Planned vs Actual Performance

Overall portfolio performance exceeded planned return expectations, with actual average ROI significantly higher than the average budgeted ROI.

Total Investment: █75.25 Lakh | **Current Value:** █96.96 Lakh | **Average ROI:** 26.45% | **Budgeted ROI:** 11.90% | **Variance:** 14.55%

06 Risk-Adjusted Returns

Returns were above the assumed 4% risk-free rate. A Sharpe Ratio of approximately 1.15 indicates positive risk-adjusted performance.

Risk-Free Rate: 4.00% | **Average ROI:** 26.45% | **Volatility:** 19.52% | **Sharpe Ratio:** 1.15

07 Scenario Analysis

Bull Market: portfolio value could increase to approximately █1.11 crore. Bear Market: portfolio value could decline to approximately █87.26 lakh.

Scenario	Market Change	Portfolio Value	Portfolio ROI
Base Case	0%	█96.96 Lakh	26.45%
Bull Market	+15%	█111.50 Lakh	41.45%
Bear Market	-10%	█87.26 Lakh	16.45%

08 Recommendations

Diversify the portfolio because Real Estate represents almost half of invested capital.

Monitor Startup exposure because higher returns may involve greater uncertainty and liquidity risk.

Review underperforming investments against their original objectives.

Track Sharpe Ratio and volatility alongside absolute ROI.

Update Bull, Base, and Bear scenarios periodically as market assumptions change.

09 Conclusion

The dashboard provides a consolidated view of portfolio performance, profitability, risk, and scenario outcomes.

The portfolio is currently generating returns above planned expectations, with Startups delivering the strongest average performance.

Regular KPI tracking, diversification, and scenario analysis can support better investment decisions and long-term portfolio management.
